RECEIVED

JUL 14 2005

G-135236

This form must be completed in full and be accompanied by a non-refundable \$50.00 filing fee (payable to the Lower Niobrara Natural Resources District). Forward this application and filing fee to:

Lower Niobrara NRD
PO Box 350
Butte, NE 68722

Please take the time and fill out the information correctly. The District will return incomplete or defective applications, with 60 days being allowed for resubmission. All permits shall be issued by the District with conditions attached, or denied not later than 30 days after receipt of a complete and properly prepared application.

PERMIT RESTRICTIONS

1. Well permits are required, prior to construction or a late fee (\$250) will be assessed.
2. The well authorized by this permit may not be constructed closer than 600 feet (1,000 feet if industrial wells or public water supplies are involved) from an existing well having a capacity of 100 gallons per minute or more, unless both the new and existing wells are owned by the same individual.
3. This permit does not register the well with the Department of Natural Resources (DNR). All wells are required to be registered with the DNR within 30 days after the well is completed.
4. Replacement wells **do not** need a permit from the LNNRD. A replacement well is one which replaces an abandoned water well that has been operated within the last three years, and is constructed to water the same tract of land as the abandoned water well which is being replaced.
5. If the well is being replaced it must be properly abandoned according to state guidelines. A copy of these guidelines are available from the Lower Niobrara NRD.
6. Permits are not required for test holes, temporary dewatering wells (less than 90 days), or wells designed to pump 50 gallons per minute or less.
7. If the well is not constructed within a one year period from the date of approval, a new permit is needed.
8. According to State law SS46-637, water wells may not be drilled within 50 feet of a stream bank without first getting a surface water right for that stream from DNR.
9. Any person who, on or after August 30, 1981 commences or causes construction of such a well for which the required permit has not been obtained, or who knowingly furnishes false information regarding such permit, shall be guilty of a Class IV misdemeanor. {SS46-602.01}
10. The applicant shall provide the District with written copies of all permits and applications filed with the State of Nebraska or its agencies concerning the proposed well. Failure to obtain the necessary permits from other state agencies shall result in a revocation of the permit granted by the District.
11. All water wells requiring permits within the District shall be constructed by a licensed well driller. The Applicant shall provide the District with the name and address of the well driller employed to construct the proposed well at the time the applicant submits the application to the District.

If possible mark (with a flag) the well site in the field.
