OWNER: William J Paasch

NOL ID: 166973689324543  
Well ID: 269199

The above well has been put in suspense status in the water well registration database maintained by the Nebraska Department of Natural Resources (Department). Its provisional registration number is G-001108. Suspense status indicates that the well is not legally registered with the State of Nebraska. The Department will require documentation that the original well that is being replaced is either decommissioned in accordance with the current water well standards for water well decommissioning or the original well has been properly modified to pump 50 gallons per minute or less and follows any applicable local Natural Resources District rules on modifying replaced wells.

The documentation either needs to be a Departmental Notice of Water Well Decommissioning Form or Pump Installation and Construction Modification Form. These should be filled out by the licensed water well contractor that does the work.

There is a 180-day time period within which the above-mentioned actions need to be taken. The forms for these must be filed with the Department within 60 days of the decommissioning or modification of the old well. If the Department has not received the proper documentation about the old (replaced) well within the time allotted, the new well will be considered illegal.

The well information can be reviewed at the Department website:  
<https://nednr.nebraska.gov/Dynamic/Wells/Wells/WellDetails?WellId=269199> .

We thank you for your cooperation. If you have any questions or comments, please let us know. Please allow up to 24 hours for the information to be displayed on the web.

Sincerely,

Jeremy Bower  
Staff Assistant, Ground Water
